EXPERIENCE

Freelance EHR & Interoperability Developer – InterSystems – R&D Pérols · 06/2026

- HL7 v2 and IHE interfaces with DTL transformations (Ensemble, IRIS, HealthShare)
- Feature development on the IntelliCare EHR (ObjectScript, Caché, IRIS)
- Development under EU MDR and ISO 13485 quality processes
- Customers: public hospitals, private clinics, cancer centres

Full-Stack Developer – Matooma (Wireless Logic Group) Pérols · 12/2024 – 03/2026

- Serverless pipelines processing and billing SIM card usage (AWS Lambda, SQS, S3, PostgreSQL)
- Back office and customer portal (PHP / Symfony, Angular)
- Grafana dashboards and alerting

Full-Stack Developer – WEDA (VIDAL Group) Montpellier · 09/2023 – 09/2024

Web-based medical records software for physicians (C# / .NET, Angular).

- Built features designed in direct contact with physicians
- Led the early phase of a WebForms-to-Angular front-end migration
- Built a data layer reading from databases with different schemas (regulatory requirement)
- Documented critical business logic

Full-Stack Developer (Intern & Apprentice) – ITUPKeep-Accueilpro Nancy · 04/2022 – 07/2023

Medical practice management software (PHP, SQL).

- Phonetic search for medication names
- Automated patient reminders (vaccinations, exams)
- Introduced Docker and Git to the project

EDUCATION

DUT (2-year technology degree), Université de Lorraine · 2020
